

Test Cases Document

Healthcare Clinic Booking Platform — REQ-FUN-05: Patient Details & Promo Code Engine

Requirement ID: REQ-FUN-05

Jira Parent: HLTHCR3-23 – Patient Details & Promo Code Engine

Total Test Cases: 12

Techniques Used: Decision Table, BVA, EP, Business Rule Testing

Author: Seif Mohamed

Phase: Day 3 – Test Case Design

This document lists the 12 test cases actually created and tracked in Jira for REQ-FUN-05, covering the Patient Selection flow, Promo Code input rules, and the discount/business logic of the three recognized promo codes.

Patient Selection & Promo Format

ID	Title	Steps	Expected Result	Prio.	Technique
HLTHCR3-103	Verify default patient selection is 'Myself'	1. Navigate to Patient Details section. 2. Observe default selection.	'Myself' selected by default. Beneficiary fields not displayed.	High	Equivalence Partitioning
HLTHCR3-104	Verify 'Someone Else' displays Beneficiary fields	1. Navigate to Patient Details. 2. Select 'Someone Else'.	Beneficiary Name and Phone fields appear and become mandatory.	High	Decision Table Testing
HLTHCR3-105	Verify switching back to 'Myself' hides fields	1. Select 'Someone Else'. 2. Fill fields. 3. Switch to 'Myself'.	Beneficiary fields hidden, no longer required.	Medium	State Transition Testing
HLTHCR3-106	Verify promo code accepted at max length (15 chars)	1. Navigate to promo field. 2. Enter 15-char code. 3. Apply.	Input accepted by field (format-valid).	Medium	Boundary Value Analysis
HLTHCR3-107	Verify promo code above max length (16 chars) rejected	1. Navigate to promo field. 2. Attempt to enter 16-char code.	Field blocks input beyond 15 chars or shows error.	Medium	Boundary Value Analysis
HLTHCR3-108	Verify promo code with disallowed symbols rejected	1. Enter 'SAVE@10'. 2. Apply.	Input rejected; only alphanumeric + hyphen accepted.	Medium	Equivalence Partitioning

Discount Rules & Business Rules

ID	Title	Steps	Expected Result	Prio.	Technique
HLTHCR3-118	Verify FLAT50 on a fee lower than the discount does not go negative	1. Enter FLAT50, fee = 30 EGP. 2. Apply.	Total floored at 0 EGP, not -20 EGP.	High	Boundary Value Analysis
HLTHCR3-119	Verify SAVE10 applies 10% discount correctly	1. Enter SAVE10, fee = 1000 EGP. 2. Apply.	Discount = 100 EGP. Final Total = 900 EGP.	High	Decision Table Testing
HLTHCR3-120	Verify a promo code cannot be applied more than once in the same session	1. Apply SAVE10 (Total = 900). 2. Attempt SAVE10 again.	Second application blocked. Total remains 900 EGP.	High	Business Rule Testing

ID	Title	Steps	Expected Result	Prio.	Technique
HLTHCR3-12 1	Verify FLAT50 deducts a flat 50 EGP	1. Enter FLAT50, fee = 1000 EGP. 2. Apply.	Flat 50 EGP deducted. Final Total = 950 EGP.	High	Decision Table Testing
HLTHCR3-12 2	Verify BEST-QA applies 100% discount	1. Enter BEST-QA, fee = 1000 EGP. 2. Apply.	Final Total = 0 EGP. Message: "Discount Applied! You are officially the best QA team."	High	Decision Table Testing
HLTHCR3-12 3	Verify unrecognized promo code is rejected	1. Enter 'ABC123', fee = 1000 EGP. 2. Apply.	Error: "Invalid or expired promo code." Total remains 1000 EGP.	Medium	Equivalence Partitioning

Precondition (applies to all 12 test cases): User is logged in and has selected an appointment slot.

Prepared as part of Day 3 (Test Case Design) — Healthcare Clinic Booking Platform QA cycle.
