

Test Case Design Document

Healthcare Clinic Booking Platform — REQ-FUN-05: Patient Details & Promo Code Engine

Requirement ID: REQ-FUN-05

Jira Task: Test Case Design

Total Test Cases: 31

Techniques Used: Decision Table, BVA, EP, Business Rule Testing

Phase: Day 3 – Test Case Design

Author: Seif Mohamed

Module 1: Patient Selection & Beneficiary Validation

ID	Title	Steps	Expected Result	Prio.	Technique
TC-01	Verify default patient selection is 'Myself'	1. Navigate to Patient Details section. 2. Observe default selection.	'Myself' selected by default. Beneficiary fields not displayed.	High	Equivalence Partitioning
TC-02	Verify 'Someone Else' displays Beneficiary fields	1. Navigate to Patient Details. 2. Select 'Someone Else'.	Beneficiary Name and Phone fields appear and become mandatory.	High	Decision Table Testing
TC-03	Verify switching back to 'Myself' hides fields	1. Select 'Someone Else'. 2. Fill fields. 3. Switch to 'Myself'.	Beneficiary fields hidden, no longer required.	Medium	State Transition Testing
TC-04	Verify valid Beneficiary Name is accepted	1. Select 'Someone Else'. 2. Enter valid name (10 chars). 3. Proceed.	Name accepted, no validation error.	High	Equivalence Partitioning
TC-05	Verify Name below minimum length is rejected	1. Select 'Someone Else'. 2. Enter 2-char name. 3. Proceed.	Inline validation error; submission blocked.	High	Boundary Value Analysis
TC-06	Verify Name at minimum boundary (3 chars) accepted	1. Select 'Someone Else'. 2. Enter 3-char name. 3. Proceed.	Name accepted, no validation error.	High	Boundary Value Analysis
TC-07	Verify Name at maximum boundary (50 chars) accepted	1. Select 'Someone Else'. 2. Enter 50-char name. 3. Proceed.	Name accepted, no validation error.	High	Boundary Value Analysis
TC-08	Verify Name above maximum (51 chars) rejected	1. Select 'Someone Else'. 2. Enter 51-char name. 3. Proceed.	Inline validation error; submission blocked.	High	Boundary Value Analysis
TC-09	Verify Name with digits/symbols is rejected	1. Select 'Someone Else'. 2. Enter 'Ahmed123!'. 3. Proceed.	Inline validation error; submission blocked.	Medium	Equivalence Partitioning
TC-10	Verify valid Egyptian phone accepted	1. Select 'Someone Else'. 2. Enter '01012345678'. 3. Proceed.	Phone accepted, no validation error.	High	Equivalence Partitioning
TC-11	Verify phone with fewer than 11 digits rejected	1. Select 'Someone Else'. 2. Enter 10-digit phone. 3. Proceed.	Inline validation error; submission blocked.	High	Boundary Value Analysis

ID	Title	Steps	Expected Result	Prio.	Technique
TC-12	Verify phone with more than 11 digits rejected	1. Select 'Someone Else'. 2. Enter 12-digit phone. 3. Proceed.	Inline validation error; submission blocked.	High	Boundary Value Analysis
TC-13	Verify phone with invalid prefix rejected	1. Select 'Someone Else'. 2. Enter phone starting with 013. 3. Proceed.	Inline validation error; submission blocked.	High	Equivalence Partitioning

Module 2: Promo Code Input & Normalization

ID	Title	Steps	Expected Result	Prio.	Technique
TC-14	Verify promo code accepted at max length (15 chars)	1. Navigate to promo field. 2. Enter 15-char code. 3. Apply.	Input accepted by field (format-valid).	Medium	Boundary Value Analysis
TC-15	Verify promo code above max length (16 chars) rejected	1. Navigate to promo field. 2. Attempt to enter 16-char code.	Field blocks input beyond 15 chars or shows error.	Medium	Boundary Value Analysis
TC-16	Verify promo code with disallowed symbols rejected	1. Enter 'SAVE@10'. 2. Apply.	Input rejected; only alphanumeric + hyphen accepted.	Medium	Equivalence Partitioning
TC-17	Verify promo code normalized to uppercase	1. Enter 'save10', fee = 1000 EGP. 2. Apply.	Normalized to 'SAVE10'; 10% discount applied (Total = 900).	High	Equivalence Partitioning
TC-18	Verify leading/trailing spaces trimmed	1. Enter ' SAVE10 ', fee = 1000 EGP. 2. Apply.	Trimmed to 'SAVE10'; 10% discount applied (Total = 900).	Medium	Equivalence Partitioning
TC-19	Verify internal space in code not accepted	1. Enter 'SAVE 10'. 2. Apply.	Treated as invalid format and rejected.	Low	Equivalence Partitioning
TC-20	Verify empty promo code applies no discount	1. Leave field empty, fee = 1000 EGP. 2. Proceed.	No discount applied; Total remains 1000 EGP.	Medium	Equivalence Partitioning

Module 3: Discount Rules per Code

ID	Title	Steps	Expected Result	Prio.	Technique
TC-21	Verify SAVE10 applies 10% discount correctly	1. Enter SAVE10, fee = 1000 EGP. 2. Apply.	Discount = 100 EGP. Final Total = 900 EGP.	High	Decision Table Testing
TC-22	Verify SAVE10 recalculates for different fee	1. Enter SAVE10, fee = 500 EGP. 2. Apply.	Discount = 50 EGP. Final Total = 450 EGP.	Medium	Boundary Value Analysis
TC-23	Verify FLAT50 deducts flat 50 EGP	1. Enter FLAT50, fee = 1000 EGP. 2. Apply.	Flat 50 EGP deducted. Final Total = 950 EGP.	High	Decision Table Testing

ID	Title	Steps	Expected Result	Prio.	Technique
TC-24	Verify FLAT50 on fee equal to discount amount	1. Enter FLAT50, fee = 50 EGP. 2. Apply.	Final Total = 0 EGP (not negative).	High	Boundary Value Analysis
TC-25	Verify FLAT50 on fee lower than discount amount	1. Enter FLAT50, fee = 30 EGP. 2. Apply.	Total floored at 0 EGP, not -20 EGP.	High	Boundary Value Analysis
TC-26	Verify BEST-QA applies 100% discount	1. Enter BEST-QA, fee = 1000 EGP. 2. Apply.	Final Total = 0 EGP. Message: "Discount Applied! You are officially the best QA team."	High	Decision Table Testing
TC-27	Verify unrecognized promo code is rejected	1. Enter 'ABC123', fee = 1000 EGP. 2. Apply.	Error: "Invalid or expired promo code." Total remains 1000 EGP.	High	Equivalence Partitioning

Module 4: Business Rules

ID	Title	Steps	Expected Result	Prio.	Technique
TC-28	Verify a promo code cannot be applied twice in a session	1. Apply SAVE10 (Total = 900). 2. Attempt SAVE10 again.	Second application blocked. Total remains 900 EGP.	High	Business Rule Testing
TC-29	Verify a different code cannot stack after one is applied	1. Apply SAVE10 (Total = 900). 2. Attempt FLAT50.	Second code not applied on top of first.	High	Business Rule Testing
TC-30	Verify total never goes negative on zero-fee edge case	1. Enter FLAT50, fee = 0 EGP. 2. Apply.	Final Total = 0 EGP (no negative total).	Medium	Boundary Value Analysis
TC-31	Verify removing a promo code restores original total	1. Apply SAVE10 (Total = 900). 2. Remove code, if supported.	Total reverts to original 1000 EGP.	Low	State Transition Testing

Precondition (applies to all 31 test cases): User is logged in and has selected an appointment slot.

Prepared as part of Day 3 (Test Case Design) — Healthcare Clinic Booking Platform QA cycle.
