

Test Execution Report

Healthcare Clinic Booking Platform — REQ-FUN-05: Patient Details & Promo Code Engine

Requirement ID: REQ-FUN-05

Executed By: Seif Mohamed

Test Cases Executed: 6 of 31

Environment: CareNest Staging (Live App)

Phase: Day 5 – Test Case Execution & Bug Reports

Bugs Found: 2 (with 1 more under investigation)

This report documents the manual execution of the highest-priority test cases for REQ-FUN-05 against the live CareNest booking flow. Each row records the actual observed result against the expected result defined during Test Case Design (Day 3).

Execution Summary

Metric	Count
Total Executed	6
Passed	4
Failed	2

Detailed Execution Log

TC ID	Test Case	Test Data	Expected Result	Actual Result	Status
HLTHCR3-103	Verify default patient selection is 'Myself'	N/A	'Myself' selected by default. Beneficiary fields hidden.	'Booking for myself' selected by default. No Beneficiary fields shown.	Passed
HLTHCR3-104	Verify 'Someone Else' displays Beneficiary fields	N/A	Beneficiary Name/Phone fields appear and become mandatory.	Patient full name / Patient phone fields appeared and accepted input.	Passed
HLTHCR3-105	Verify switching back to 'Myself' hides fields	N/A	Beneficiary fields hidden, no longer required.	Fields disappeared completely after switching back to 'myself'.	Passed
HLTHCR3-106	Verify promo code accepted at max length (15 chars)	Code = 'ABCDE FGHIJKLMNO' (15 chars)	Field accepts the full 15-character input.	Field truncated input to only 10 characters ('ABCDEFGHIJ').	Failed
HLTHCR3-119	Verify SAVE10 applies 10% discount correctly	Code = SAVE10, Fee = 90 EGP	Discount = 9 EGP (10%). Final Total = 81 EGP.	Discount applied was a flat 10 EGP instead of 10% of the fee.	Failed
HLTHCR3-122	Verify BEST-QA applies 100% discount	Code = BEST-QA, Fee = 90 EGP	Final Total = 0 EGP. Message: "Discount Applied! You are officially the best QA team."	Under investigation – see Bug Report HLTHCR3-126 for details.	Open

Notes & Observations

- Field naming discrepancy: the live app labels the beneficiary fields 'Patient full name' / 'Patient phone' instead of the SRS wording 'Beneficiary Name' / 'Beneficiary Phone'. Functionally equivalent — logged as a documentation note, not a defect.
- HLTHCR3-106 failure directly caused HLTHCR3-124 bug report (promo code field truncation).
- HLTHCR3-119 failure directly caused HLTHCR3-125 bug report (SAVE10 flat-amount miscalculation), rated High priority due to direct financial impact on patients.
- Remaining 25 test cases (TC-05 to TC-13, TC-14/15/16/18/20, TC-23/24/25/27/28/29/30/31) are pending execution.

Prepared as part of Day 5 (Test Case Execution & Bug Reports) — Healthcare Clinic Booking Platform QA cycle.
